[a] Not available.

[b] Since a new code book had just come into use, it is possible that Moscow-Ankara No.125 ordered its use; furthermore there is a strong probability that the person addressed is the same as a person elsewhere (Moscow-San Francisco No.109 of 11 April 1944, unpublished) implied to be the predecessor of RYZHIKH, chief of the Tenth OTDEL (cipher). Therefore, VOLKOV may have been the NKID cipher clerk at Ankara.
